7 AN HEAT PUMPS | 32 FCXUSP FAN COILS

Seven Aermec AN heat pumps are being used to provide comfort cooling and heating for 9 dormitory style buildings in this brand new government project in British Columbia. The heat pumps are self contained with internal pumps, storage tanks air elimination etc. The Aermec fan coils provide hydronic heating and cooling to each suite and contain electric heat for back up heat. Each fan coil has its own thermostat providing individual comfort control. Aermec heat pumps and fan coils also provide for heating and cooling the administration building.
